Julius Getting Stabbed

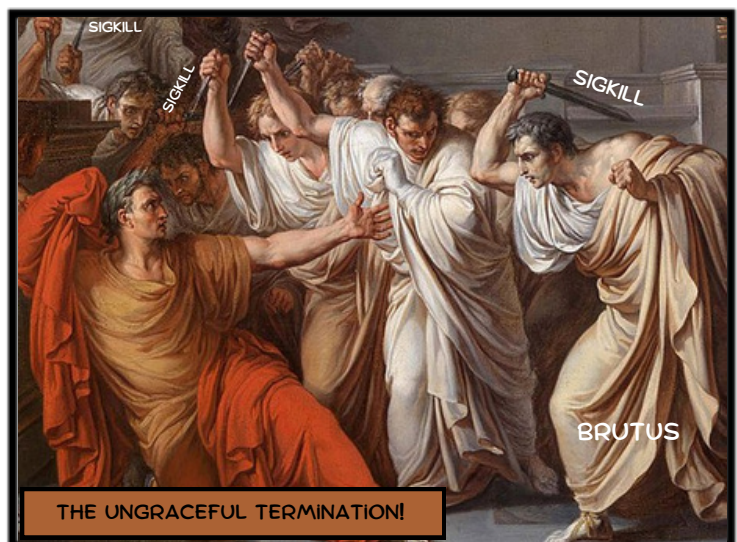

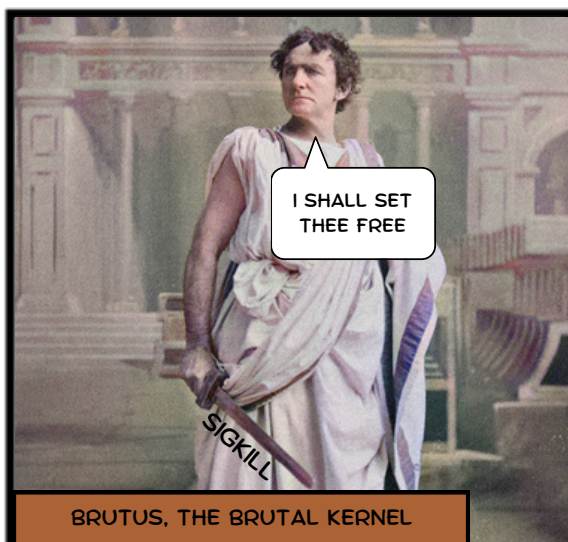

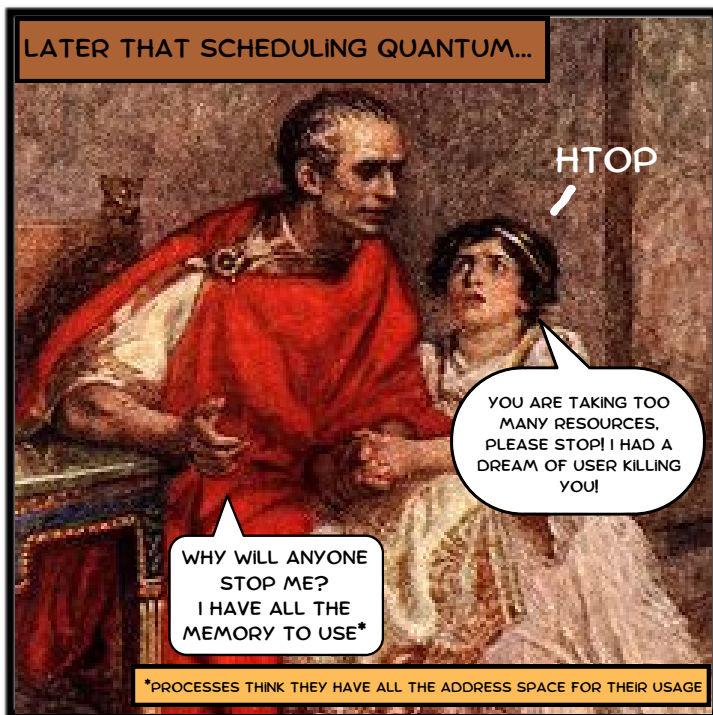

By: Gautam Ahuja, Nistha Singh

*Or Monsson, since we cannot decide whether to take the umbrella or not these days

Once upon a time, in the land of RomeOS, there was a pesky little process named Caesar.exe. Caesar was a resource hog and had dreams of taking over the entire operating system. He rampaged through the CPU like a gladiator on steroids, causing chaos and mayhem. But when the User finally noticed what was happening, he wasn't about to let Caesar get away with his shenanigans. The User sent out the mighty Signals, like a legion of soldiers ready to do battle. Caesar.exe trembled in fear as he realized he had met his match. Let's just say that Caesar learned the hard way that you don't mess with the User and his army of Signals, or you'll end up in the Colosseum of the Recycle Bin, where your fate is sealed forever!

Now that your eyes are
open, make the sun jealous
with your burning passion to
start the day. Make the sun
jealous or stay in bed.

-MALAK EL HALABI
